# UTP ESSENTIALS APP PROPOSAL

called XANAX

## 1.0 PROJECT TITTLE

UTP Essential App is communications and an entertainment apps develop by us (XANAX) to help students convey knowledge, emotion, and information. Personal objectives, such as those of UTP students who wish to express their thoughts or feelings but are reluctant to do so in public, can be an example of this.

## 2.0 OBJECTIVE

We are aware that the primary factor in building relationships and alliances between UTP students is communication. So, ensuring that the UTP pupils get along and live in harmony is one of the key goals of the XANAX app.

## 3.0 PROBLEM STATEMENT

Differences in culture, origin, and intake year contribute to the large social gap between UTP students and this makes it hard for some individuals to communicate among themselves even in classes and group projects.

## 4.0 SOLUTION

Minimizing the social gap among UTP students from different courses and intake through a social application called XANAX which is accessible and free to all UTP students with an electronic gadget and a connected Wi-Fi, students can easily communicate and enjoy their time together wherever and anytime with each other.

## 5.0 FEATURES

XANAX is an application where students can open up discussions about topics that they are interested in. They can share their thoughts and also communicate with the users anonymously. If the users don't feel like communicating through text, they can use reaction button to react to the confessions.

## 6.0 TEAM ORGANIZATION CHART
